Imagine if scientists from the future came upon a city in our day as an archeological dig. In this city they found it's residents dead in their homes while in the midst of daily routines. This would clearly indicate that some catastrophe must of happened to kill these residents where they stood while in their daily routine. To think otherwise would be rather foolish. Yet this is just what the public is expected to believe by "modern scientists" today in regard to "CAVEMEN". Cavemen: a term used by scientists to describe an assumed civilization of early human beings that dwelled in caves. If evolution is true then the remains of a sub-human species living in primitive structures like caves would be just what you would expect to find. However there are some major problems with what we do find that are inconsistent with this whole idea! Why is it that we find the bodily remains of these people in their caves as if they died there while in their daily life. We find no bedrock cemeteries with Fred and Wilma headstones or markers showing generations with a social structure. Consistent with "caveman" diggings is the dead bodies lying within the caves. Makeshift burials are found with bodies but these are within the structure of the caves along with the dead bodies of others unburied in a daily routine of living! This is more of an indication of some kind of catastrophic event that happened world wide to produce death to all within these caves. One problem today is that most scientists are trained that evolution is a fact and not just a theory. Most do not believe in any accounts contained in the Bible as having any accurate historical reality. In their unbelief they reject the obvious evidence as described in the scriptures and draw a wild fictional history of pre-dawn man and his "ascension" to that of "Modern man" today .

---

---

The fact is the Bible gives us an account of two major catastrophes in our history. One was the great flood that encompassed the entire world. A thick water vapor canopy once enveloped the earth. This canopy bursted producing the first rain pour ever. At the same time subterranean waters bursted from below. The Bible records that this event took 40 days to accomplish the final resulting world-wide flood. In that time it is only common sense to realize that the peoples of the earth would seek high ground and seek the only natural protection available, CAVES! In this environment, they would bury their dead in makeshift graves, hunt, eat whatever they could catch with whatever primitive weapons they could form and perhaps try to record upon the walls events as they happened. Children would also draw cave pictures to help calm them from the terror around them. Eventually there they died in the caves while struggling to survive. Even the myth that these were primitive forerunners to modern man does not hold up. Recently scientists admitted that Neanderthal man walked upright, having the same posture as modern man. It has also been admitted that the Neanderthal man's cranial capacity is actually slightly larger than that of "modern Man". His bone structure also indicates muscle and sinew that would make him far stronger than that of modern man. Recent DNA tests have shown this being to be a completely different species than that of man . The Bible mentions a time when there was a "different species" of non humans which existed on the earth! Did you also know that Cro-Magnon an early Caucasian had a larger brain capacity than that of modern man. There have also been skeletal remains of the other races that were more advanced than that of modern man. The Mullions, a Semitic race was discovered living as an entire civilization which

---

---

suddenly died. There fossil remains being the largest ever found in one dig. The Boskop man, also fossil remains of a Negroid race who also had a larger brain capacity than that of modern man. How are these inconsistencies explained? They aren't! They are completely ignored or overtly suppressed from the general public. If evolution by the process of natural selection is the truth, then we would expect the superior life forms to survive and overtake the weaker ones. Our fossil remains indicate just the opposite. This is exactly what the Bible indicates happened, a judgement from God upon the "son's of God" and their offspring, the "mighty men of renown". These "Sons of God" are hotly debated even among Christian believers as to who they are. Consistent to word usage and contextual use, these sons of God were fallen Angels that crossed over to the flesh and blood plane and inter-married with the human race. This resulted in a variety of hybrid humans. This was looked upon as a horror of contamination by God. That was the real reason for the flood in the first place. Secular history of all cultures records this time as the "golden age" when god-men walked the earth. Only the Bible tells this same story as the immoral contamination of non-humans and the unbelief of the human inhabitants in God. The end result being a genetic contamination of the entire Human race! Why would such a thing happen? The first prophecy in the Bible predicts that through the human lineage would come one who would "crush the serpents head". Gen3:16. This was in reference to Jesus Christ and his redemptive work. As a rebel, Satan tried to stop this from ever happening by contaminating the entire human race. The Bible records that he was only eight people away from accomplishing this! Fossil remains are all that is left of this time of

---

---

rebellion. The invisible spirits we call demons and ghosts are life force remains that carry on. Sentenced to wander and roam the earth as disembodied spirits in a cycle of being cast back into a hollow domain in the earth. Prophecy claims that these “ghosts of the giants” will reappear again in physical form in the last days just before the second coming of Jesus Christ to once again deceive the whole world. Jesus himself said, **And as it was in the days of Noah, so shall it be also in the days of the Son of man.** Luke 17:26 What do you choose to believe? Could the Bible be true or will you believe unbelieving Scientists who act as priests that tell you what to believe based upon their assumptions? Be careful what you believe for it will have eternal consequences. In prayer you can challenge a God who loves you. Ask him if he is real. Ask him to reveal himself to you and then wait and watch. In some special way you will know there is a God and he has a name and that name is Jesus. The only true God who became man to destroy the works of a rebel Satan and restore mankind to himself. He paid a price for you that you could not pay. It is a free gift for the asking.

Man did not evolve from protoplasmic goo as scientist-priests would have you believe. Man was created complete and whole in the image of God. He was transformed into a lesser state and placed into a mortal linear existence because of the deceptive “fall” at Eden by the “serpent”. This serpent is not just a smart snake as typically depicted, but rather a rebel creature of reptilian nature from an angelic order of creation. A portion of these creatures with their leader Lucifer rebelled against God and tried to create their own imitation of creation. That is the Fall! It is ongoing and will continue until God finally puts and end to linear time. (See the Eden tract

---

and Blood power for more detail). Part of this deception placed upon mankind is the false notion that modern man evolved from “cavemen” and continues to evolve into something “Higher”. If you can believe in this cosmology and the assumed past which is presented to you by scientist-priests, then you will also believe the “New Age” warnings and message that man needs to continue evolving into something “Higher” than himself. If you are to consider actual fossil remains and all available Archeological evidence in possible light of what the scriptures have to say a very different past and cosmology is revealed. Anomalies abound but their interpretation still depends on faith. Faith in a loving God and his word to you or faith in Scientists-Priests who tell you what to believe based on their assumptions. In this sense you are at the same crossroad Adam and Eve were once at. Which tree do you pick? The tree of life symbolized by having Faith in a loving God? Or The tree of the knowledge of good and evil, symbolized by rebellion and self reliance.

What and who will you believe?

## The “Caveman” Myth
